OVERALL EVALUATION: Accept, Accept with revisions

Comment to author:

#1: Good paper; interesting work. What theory/research are you drawing on? (could be clearer in the beginning). How could this be applicable in other settings? What do you hope to repeat/find in another try?

The comment at the end about PARC is the most interesting - say more about this, or at least what you hope to find from this. 'Looking forward to the paper.'

Minor issues:

Fonts in Figures are too small; very hard to read. Capitalization for Table I caption is reversed. Citation [4] is missing some pieces; check the rest.

#2: the paper provides a complete description of the work covering all aspects of delivering the

course. I got the impression however that this is high level, e.g. Peer evaluation by students. what form does it take? (duration, formality). Also the evaluation is a class level "their understanding of concepts was good. Did all students share the same level of understanding?

Since "work from home" during COVID-19 is mentioned, I would like to see the experience and the differences caused by this abnormality. Did it cause enough disruption making the study incomplete or not and why?

Paper Submission

In order for your paper to be published in the proceedings, it must be submitted in camera-ready form via the submission system at
