## Report of Workshop on “Embedded System Projects Design” 27-28 Oct. 2018

A workshop on Embedded System Projects Design was held at Texas Instruments Innovation Center at JK Lakshmipat University on 27<sup>th</sup> & 28<sup>th</sup> October 2018. Prof. Dhananjay Gadre, Associate Professor Netaji Subhas University of Technology, New Delhi was invited as expert for workshop. The workshop started with lighting of Electronic Lamp by Prof. R.L. Raina, Vice- Chancellor JKLU, Prof. Dhananjay Gadre, Invited Expert and Prof. Sanjay Goel, Director Institute of Engineering & Technology, JKLU. Prof. Gadre demonstrated a variety of sophisticated embedded system projects. The workshop was attended by faculty members of the departments, namely Electronics and Electrical Engineering & Computer Science Engineering. The university has a rich resource of laboratories and deliberations were made on collecting real time data from these laboratories using Embedded systems boards for further processing. Hands-on session was conducted in the afternoon on advanced microcontrollers as part of skill updating for faculty members. Prof. Gadre updated the ECE faculty members on design of curriculum and projects using innovative ideas and latest components.

**Report of Training Program on “Electrical Safety”  
December 15, 2018**

A training program on Electrical safety was organized by Dr. Pushpendra Singh, Associate Professor, EEE and H. P. Agrawal, Assistant Professor, EEE dated December 15, 2018 for lab staff of all engineering departments. The primary aimed of training program to educate the participant about electrical safety during working in laboratories and with the house hold appliance. The training session began with Fundamental of Electricity and Dangers from Electricity during Operation and Maintenance. Second session was on Accident Prevention and Earthing / Grounding Systems. Third session was on Electrical Protection systems and equipments for safe Operation. During the training program a visit of power house at JKLU was arranged for the participants.

In the end of training program Dr R. L. Raina, Vice Chancellor, JKLU ask some questions from the participants and motivate them to attend such type of programs.

The participants thoroughly enjoyed the training and expressed their interest to attend such training in future as well.

## Report of workshop on Internet of Things (IoT) December 21, 2018

The workshop on “Internet of Things (IoT)” was held at JK LakshmiPat University, Jaipur on December 21, 2018. The workshop was conducted by Dr. Devika Kataria, Associate Professor, Electrical and Electronics Engineering. The participants were faculty members of Institute of Engineering and Technology.

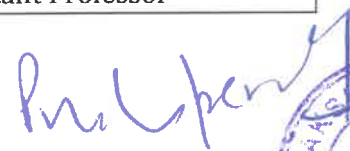

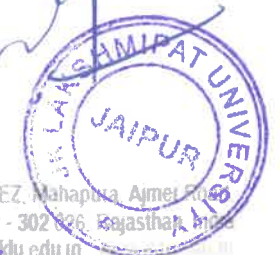

The workshop commenced with welcome speech by Dr. Sanjay Goel, Director-IET, and explained the objectives and importance of the workshop.

Dr. Kataria shared her insights, real life scenarios, practical use cases and their solutions on Internet of Things and hands on development using various IoT kits. The workshop was focused on the key concepts related to the Internet of Things and the participants received a brief overview of the following topics: Introduction to the Internet of Things, The Arduino Platform, Reading from Sensors, Programming fundamentals, Arduino Programming & Interface of Sensors, Simple LED Program for Arduino, Integrating Sensors & Reading Environmental Physical Values.

The workshop was very helpful to the faculty members understand the detailed process.

## Report of workshop on Python Programming

January 05, 2019

A workshop on Python Programming was held on January 05, 2019 at JK LakshmiPat University Jaipur. The workshop was conducted by Dr. Sonal Jain, Associate Professor, Computer Science and Engineering. The workshop was conducted for the faculty members for Institute of Engineering and Technology and Institute of Management.

The objective of this workshop was to train the participants as per the industrial scenario.

Python is an open source, high level and powerful programming language that is well suited for scientific computing. The aim of the workshop was to provide training on the use and benefits of open source software and the aspects of Python Programming. The workshop comprised of interactive sessions interleaved with hands –on training.

Topics covered in the Workshop

- Basic understanding of Python Programming
- Logical Problem solving using Python
- Introduction to Python Tools

The workshop received an excellent feedback from the participants. The participants were provided with Certificate of participation.

**Report of Masterclass on  
“Experiential & Project-based Learning in Engineering Education: How to make it  
work”**

**11-12 Jan. 2019**

The first Masterclass offered outside the US featuring approaches from Olin College of Engineering on “Experiential & Project-based Learning in Engineering Education: How to make it work” during 11-12, January 2019 at JK LakshmiPat University. Participants get a first-hand opportunity to witness the learning experience & environment and interact with faculty and students who are implementing project-based learning in the Indian context. The program will be chaired by Dr. Siddharthan Govindaswamy, BS, MS and Ph.D., Massachusetts Institute of Technology, USA, Associate Professor, Olin College of Engineering, USA. The Masterclass was inaugurated by Prof. MP Poonia, Vice-Chairman AICTE. Prof. MP Poonia emphasized on providing students autonomy, time and space in order to improve the desired skills such as innovative, decision making and problem-solving skills. Technical education success rate is less than 50%, 30% of which found eligible for industries. Looking at increasing in dropout %, focus on teaching learning method need to be improved. He encouraged such pedagogy of project-based learning. He appreciated what JKLU is practicing such pedagogy which currently our country demands.

## Report of workshop on “Developing LOs for the courses” January 19, 2019

A workshop on Developing LOs for the courses was held on January 19, 2019 at JK Lakshmipat University Jaipur. The workshop was conducted by Dr. Sanjay Goel, Director, Institute of Engineering and Technology for the faculty members of University.

Learning outcomes are user-friendly statements that tell students what they will be able to do at the end of a period of time. They are measurable and quite often observable. Learning outcomes are usually discussed within the context of program-wide assessment, but they can be valuable components of any course because of the way they sharpen the focus on student’s learning.

he focused on approach to develop the Learning outcomes:

- state in clear terms what it is that your students should be able to do at the end of a course that they could not do at the beginning.
- focus on student performances, rather than on instructional techniques or course content.
- student-centered rather than instructor-centered.
- explicitly communicate course expectations to your students.

In the workshop a session on writing the Effective Learning Outcomes was conducted. The key to write the effective learning outcomes is the selection of active, measurable verbs—the tasks you want students to do at the end of your class. Words like know, understand, or appreciate are difficult to measure, and they rarely get at the higher order thinking tasks most of us really want to see in our students. Consider, instead, more specific words like these, which progress toward more complex intellectual tasks: Recall, Interpret, Compare, Differentiate, Implement, Judge, Create etc.

The Learning Outcomes once properly articulated also help us to decide the right teaching method for the entire course or for specific modules. With LOs being clear, we can then use multiple teaching methods across and even within a single course.

The participants thoroughly involved in the the workshop and expressed their interest to attend such brain storming and informative workshop on Developing Los for the courses.

## Report of Workshop on "Rain Water Harvesting: A solution to future Water problem" 24 Jan. 2019

A workshop for faculty members on rain water harvesting organized on Jan. 24, 2019. Dr. Kedar Sharma, Associate Professor in Department of Civil Engineering is the key resource for the workshop. The workshop covered the major challenges of water availability in the country, rain water distribution in India, introduction to rain water harvesting and various methods of rain water harvesting. It was discussed in the workshop that rain water harvesting methods depends on the type of soil, number of rainy days and type of terrain. Economic viability, awareness and less number of rainy days are biggest challenge in rain water harvesting. However, due to the rapid increase in the water demand in the urban areas, rain water harvesting is the need of hour.

## Report of workshop on “Developing POs/PEOs and PSOs” February 02, 2019

A workshop on Developing POs/PEOs and PSOs was held on Feb. 02, 2019 at JK LakshmiPat University Jaipur. The workshop was conducted by Dr. Sanjay Goel, Director, Institute of Engineering and Technology for the faculty members of University.

The workshop was started with welcoming of all the participants by Dr. Goel. The workshop was conducted in four sessions. First session was to developing the PEOs, second session was to developing POs, third session was to developing PSOs and fourth session was to clarify the doubts.

### Program Education Objectives

The B.Tech., PG Diploma, and M.Tech. Programs at IET, JKLU designed to prepare students for continued learning and successful careers. The students will be able to:

- PEO1: Apply their technical knowledge, complex problem solving and research skills in professional practice.
- PEO2: Continue their intellectual development through critical thinking, self-study, apprenticeship, higher education, professional development courses, as well as participation in research groups and professional networks.
- PEO3: Serve as ambassadors for engineering and sustainability by exhibiting high professional standards with a deep sense of civic responsibility.
- PEO4: Effectively communicate about technical and related issues.
- PEO5: Embrace the roles of team members and leaders in their careers.

### Program Outcomes

The graduates of B.Tech., PG Diploma, and M.Tech. Programs at IET, JKLU will have the following competencies:

- PO 1: Life-long learning:* Demonstrate inquisitiveness, open mindedness, and the ability to engage in independent and life-long learning in the broadest context of technological, organizational, economic, and societal changes.
- PO 2: Citizenship, Sustainability, and Professional ethics*
- PO 2a:* Demonstrate knowledge of constitutional values of liberty, equity, justice, and fraternity with an understanding of the impact of the engineering solutions in societal and environmental contexts as well as a sense of responsibility for sustainable development.
- PO 2b:* Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, cultural, and environmental issues and the consequent responsibilities relevant to professional engineering practice.

- PO 2c: Demonstrate commitment for professional integrity and excellence and respect for ethics, responsibilities and norms as prescribed for the engineering practice.
- PO 3: Engineering knowledge and Modern tool usage
- PO 3a: Demonstrate a clear conceptual understanding of the fundamentals of engineering specialization and cognitive flexibility to appropriately 'transfer' what has been learned in a context, to different situations.
- PO 3b: Apply engineering thinking, computational thinking, and the knowledge of mathematics, natural and social sciences, engineering fundamentals, information technology, engineering specialization, and engineering management to the solution of complex engineering problems.
- PO 3c: Create, select, modify, and apply appropriate techniques, best practices, standards, resources, and modern engineering and IT tools including prediction and modeling to engineering and social activities with an understanding of the limitations.
- PO 4: Complex problem solving, Design and Research
- PO 4a: Identify, formulate, review research literature, and analyze complex engineering problems to arrive at substantiated conclusions using critical thinking along with principles of mathematics, computing, engineering as well as natural and social sciences.
- PO 4b: Use systems thinking and reflection to identify and consider underlying structures, patterns, volatility, uncertainties, complexities, ambiguities, complications, and risks to design and develop engineering solutions for complex problems to meet the specified and anticipated needs with appropriate concern for constraints, performance, sustainability, and professional ethics.
- PO 4c: Use research-based knowledge and research methods including design of experiments, simulation, analysis and interpretation of data, and synthesis of the information to evaluate and improve the engineering solutions and practice.
- PO 5: Individual & teamwork and Engineering management
- PO 5a: Ability to work effectively as an individual and as a team member or a leader in diverse and distributed teams, and in multidisciplinary settings.
- PO 5b: Ability to apply engineering management principles to one's own and team's work to manage engineering projects and operations and in multidisciplinary environment.
- PO 6: Communication: Ability to communicate effectively on complex engineering and technology activities, situations, problems, and solutions using verbal, textual, and pictorial elements with the colleagues, engineering community, users, clients, policy makers, and society at large with intellectual honesty, clarity, empathy, and compassion.
- PO 7: Innovation and entrepreneurship:

PO 7a: Demonstrate enthusiasm and understanding to identify opportunities and translate research in engineering and other disciplines to conceive and design innovative engineering solutions for business, industry, and societal problems.

PO 7b: Demonstrate enthusiasm and understanding to conceive and plan technology based new ventures either as independent start-up businesses or within existing corporate structures.

#### Program Specific Outcomes

##### B.Tech. (Civil Engineering)

The civil engineering graduates of JKLU will be able to:

1. Conceive, design, implement and manage civil infrastructure systems, structures and processes by using principles of structural engineering, transportation engineering, water management, geotechnical engineering, project management, computing, automation, sustainability, and contemporary materials and tools.
2. Serve in fields of construction industry, infrastructure management or consultancy services.

##### B.Tech. (Mechanical Engineering)

The mechanical engineering graduates of JKLU will be able to:

1. Conceive, design, implement and manage mechanical systems, components, and processes by using principles of machine design, production engineering, thermal engineering, computing, automation, sustainability and contemporary materials and tools.
2. Serve in fields of engineering services, manufacturing, automobile, energy, EPC and mechatronics.

##### B.Tech. (Electrical and Electronics Engineering)

The electrical and electronics engineering graduates of JKLU will be able to:

1. Conceive, design, implement and manage electrical or electronic systems by using principles of circuit design, machines, communication systems, signal processing, digital systems, power systems, automation, control systems, computing, sustainability and state of the art components and tools.
2. Serve in fields of telecommunication, manufacturing, energy, EPC, IT and engineering services.

##### B.Tech. (Computer Science and Engineering)

The computer science and engineering graduates of JKLU will be able to:

1. Conceive, design, implement, and manage computational and information processing systems, agents and processes by using principles of computer science, computer

engineering, software engineering, artificial intelligence, data analytics, sustainability and state of the art platforms, components, and tools.

2. Serve in ICT areas such as software development, data science, IT infrastructure, cybersecurity, data administration, system administration in business, consultancy, industry, government, healthcare, etc.

#### M.Tech. (Health, Safety and Environmental Engineering)

The Health, Safety and Environmental Engineering graduates of JKLU will be able to:

1. Interpret and apply legislative requirements, industry standards, and best practices in a variety of workplaces.
2. Collect, manage, and interpret information and data to identify hazardous conditions and practices in a variety of workplaces.
3. Prevent and control harm to workers, property, the environment and the general public by conceiving, designing, and implementing alternative engineering and management systems and practices in compliance with laws and/or employer policies by using principles of engineering, industrial safety, risk management, data analytics, automation, and state of the art platforms, components and tools.
4. Serve in fields of environmental health and safety, safety engineering, industrial hygiene, safety and occupational health in business, consultancy, industry, government, healthcare, education, research, etc.

#### PhD Program at JKLU

##### Program Education Objectives

The PhD Program at JKLU is designed to prepare scholars for advanced research career in academia, industry, government, and consulting. The students will be able to:

- PEO1. Formulate and systematically investigate research issues, place the results in a broader context and contribute new knowledge through peer reviewed high quality research publications.
- PEO2. Continue their intellectual development through individual research as well as participation in cross-disciplinary research groups and networks.
- PEO3. Serve as ambassadors for scientific worldview, their discipline and sustainability by exhibiting high professional standards with a deep sense of civic responsibility.
- PEO4. Effectively convey knowledge in a pedagogical manner.
- PEO5. Embrace roles of team members and leaders in their career.

### Program Outcomes

The graduates of doctoral program at JKLU will have the following competencies:

#### PO1: Advanced Knowledge

PO1a. Mastery over a substantial body of knowledge at the forefront of their discipline and related areas along with relevant methods and techniques.

PO1b. Broad understanding of the context and research environment including processes for funding, evaluation, and academic or commercial utilization of research.

#### PO2: Critical Thinking, Complex Problem Solving and Research

PO2a. Critically evaluate information, ideas and research from multiple perspectives and integrate knowledge at the forefront of their discipline.

PO2b. Identify and define emerging problems and offer ingenious solutions.

PO2c. Independently formulate and scientifically evaluate ideas and hypotheses.

PO2d. Design and execute systems for the acquisition, collation, and analysis of information through effective use of appropriate resources and technology.

PO2e. Design, develop and implement research projects that result in development of knowledge and theoretical constructs according to the research standards of their discipline.

PO3: Project Management: Apply effective project management in research through the setting of appropriate research goals, intermediate milestones, prioritization of activities, documentation, reporting and reflection on progress.

PO4: Sustainability and Ethics: Critically assess, analyze and engage with the legal, sustainability and ethical context and implications of their research.

#### PO5: Personal Effectiveness, Communication, Collaboration and Leadership

PO5a. Demonstrate intellectual habits of inquisitiveness, open-mindedness, originality, perseverance and integrity in their working.

PO5c. Effectively communicate complex ideas, issues and conclusions, present and defend their research, and prepare grant proposals consistent with the standards of their discipline.

PO5d. Plan, design and deliver courses for effective learning.

PO5e. Provide intellectual leadership for designing and managing complex systems as well as solving and resolving complex problems and issues through communication, collaboration and courage.

The participants thoroughly involved in the the workshop and expressed their interest to attend such brain storming and informative workshop on performance assessment of students.

## Report of workshop on “Design of interdisciplinary courses” February 16, 2019

A workshop on Design of Interdisciplinary courses was held on Feb. 16, 2019 at JK LakshmiPat University Jaipur. The workshop was conducted by Dr. Sanjay Goel, Director, Institute of Engineering and Technology for the faculty members of University.

Interdisciplinary teaching can prepare students to solve real-world, multi-faceted problems related to sustainability. It can come in a variety of different formats, from fully integrated courses to courses that are linked by themes. Common to all types of interdisciplinary teaching is the benefit students and faculty receive from learning about multiple perspectives, which has value for retention, student engagement, transfer, and spurs systems thinking and working as a team. There are four cognitive abilities that the literature on cognition and instruction suggest are hallmarks of interdisciplinary learning:

- develop and apply perspective-taking techniques;
- develop structural knowledge of problems appropriate to interdisciplinary inquiry;
- integrate conflicting thoughts from two or more disciplines; and
- produce a cognitive advancement or interdisciplinary understanding of a problem.

Dr. Goel explains how these abilities may be expressed in the assessment and assessed on both the course and program levels.

The participants thoroughly involved in the the workshop and expressed their interest to attend such brain storming and informative workshop on performance assessment of students.

## Workshop on "Role of Lab staff in Project based learning" Feb. 23, 2019

JKLU organized a workshop on Role of Lab staff in project based learning. The resource person were Dr. Devika kataria, Associate Professor-EEE and Dr. Ravi Shankar Prasad, Associate Professor-ME, dated Feb. 23, 2019 for lab staff of University. The workshop was focused on:

- Purposes of your Lab
- Prepare for your lab
- Understand the projects for PBL
- Learn the ways to simplify the project approach
- Answer the questions raised by the students
- Evaluate your lab
- Safety measures

During the workshop, the PBL approach discussed in very descriptive manner for successful execution of PBL courses.

At the end of workshop Dr Sanjay Goel, Director-IET, JKLU emphasized on "Ask students how they experienced the lab (e.g., highlights, challenges, takeaways) and note any feedback that can inform and improve future lab sessions".

The participants thoroughly involved in the workshop all the time with full enthusiasm.

### List of Participants

## Report of Workshop on “Performance assessment of the students” April 20, 2019

A workshop on Performance assessment of the students was held on April 20, 2019 at JK Lakshmipat University Jaipur. The workshop was conducted by Dr. Sanjay Goel, Director, Institute of Engineering and Technology for the faculty members of University.

The goal of assessment, whether for an academic department or a program, is to provide:

- a clear conceptualization of intended student learning outcomes,
- a description of how these outcomes are assessed and measured,
- a description of the results obtained from these measures, and
- a description of how these results validate current practices or point to changes needed to improve student learning.

he discussed the following evaluation components for performance assessment of the students:

Sr. No	Specifications	Marks
1	Attendance	
2	Assignment	
3	Class Participation	
4	Quiz	
5	Theory Exam-I	
6	Theory Exam-II	
7	Theory Exam-III	
8	Report-I (case study)	
9	Report-II	
10	Report-III	
11	Project-I	
12	Project-II	
13	Project-III	
14	Lab Evaluation-I (Continuous)	
15	Lab Evaluation-II (Exam)	
16	Course Portfolio	
<b>Total (100)</b>		<b>100</b>

The participants thoroughly involved in the the workshop and expressed their interest to attend such brainstorming and informative workshop on performance assessment of students.

## Report of workshop on “Developing course articulation matrix” May 04, 2019

A workshop on Developing course articulation matrix was held on May 04, 2019 at JK Lakshmipat University Jaipur. The workshop was conducted by Dr. Sanjay Goel, Director, Institute of Engineering and Technology for the faculty members of University.

Dr. Goel focused on preparing the comprehensive PO-LO spreadsheet that will now help us capture a lot of very useful Outcome-Based Education (OBE) related data regarding the courses in a structured manner. He discussed the The proposed format has 14 Sub tables that need to be filled for each course and a lot of automation can be implemented through rules and macros. He focused on developing a sophisticated dashboard to query over all these sheets.

The Curriculum Maps (PO-LO, PO-assessment, LO-Performance Indicator-Bloom, LO-assessment, etc.) for the courses may be developed in the spreadsheet template.

In the last session of workshop, the discussion was conducted for discussing the doubts of raised by faculty members.

The participants thoroughly involved in the the workshop and expressed their interest to attend such brain storming and informative workshop on performance assessment of students.

## Report of Workshop on “Experience of Teaching PBL Course” 9 May 2019

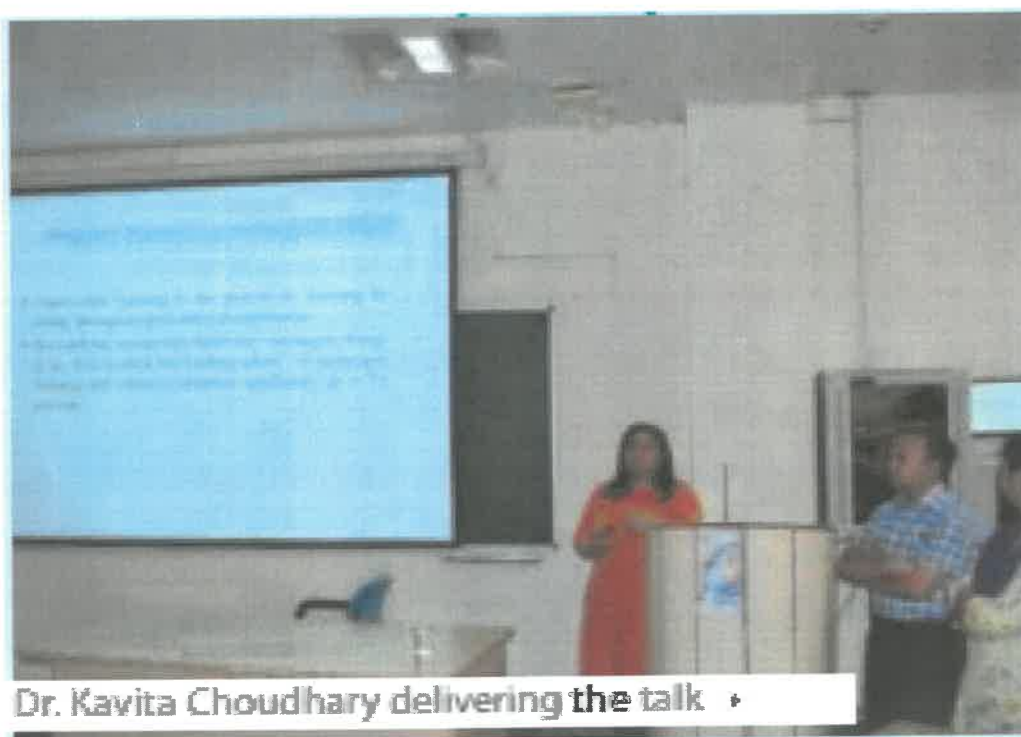

A workshop on Experience of Teaching PBL Course on May 9, 2019. Dr. Sonal Jain-Associate Professor, Dr. Umesh Gupta-Associate Professor and Dr. Kavita Choudhary Associate Professor shared their journey of designing and facilitating the project-based learning course Computational Data Analysis. They showcased effective practices of delivering concepts of the course that integrated statistics, linear algebra, and python.

They discussed various things for selecting the proper projects for the course and developing the course material, handouts, and tutorial sheets. In the last session of workshop, the various evaluation components were discussed.

## Report of Workshop on "Scholarly Writing"

6 June 2019

A workshop on Scholarly writing was conducted by Dr. R L Raina, Honorable Vice-Chancellor, JK LakshmiPat University, on 6 June 2019. Dr. Raina focused on "Briefings of Scholarly Writing" where-in he shared nitty-gritties of getting research work published in quality journals. He started the workshop with knowledge cycle. He discussed Anatomy of paper which includes Title, Abstract, Key words, Introduction, Literature Review, Hypotheses, Methods, Results, Discussion, Conclusion, References and Appendix/Annexures. He shared very important points like number of words in Title, refined ways to choose Key words, Difference between summary and abstract, difference between appendix and annexure. The workshop was very helpful to all participants of JK LakshmiPat University.
